Bron

Do we know if there is medical representation on this cluster clinical review committee?
Is this the one that there is a GP from each town on?

Perhaps with better quality and more expeditious GP input farces like these which are a waste of time and resources could be better avoided.

Cheers

Ian

Thanks Bron,

We need to be careful here. I strongly sense that this email suggests that the Clinical Review Committee will be regarded by CHSA as a proxy for RDGP.

Could we please consider a strategy to counter this? At last as an agenda item for the next Board meeting...

The breadth of distribution of this message suggests to me that they are looking to sideline us by using others' opinions.

Regards,

D.R.

Good morning all

Please note we have received advise back from the commonwealth that the submission for aged care nurse practitioner model for the Riverland was unsuccessful.

As all aware, this was a short time process that we were given to develop this submission, that lacked effective coordination and engagement, and now with the establishment of the cluster Clinical Review Committee, we will be able to ensure that we have a better coordinated approach to any opportunities as they present in the future.

Cheers
