

Immunisations help children in our community stay healthy by preventing serious infections and diseases.

Immunisations that are due at age 4, protect your child against:
Measles, Mumps, Rubella, Polio, Diphtheria, Whooping Cough, Tetanus.

- The risks associated with these diseases are far greater than the very small risks associated with being immunised
- For more information about immunisation ask your GP or visit the Immunise Australia website at
www.immunise.health.gov.au

Or call the Immunise Australia toll free information line on
1800 671 311

Is your child 4, have they had their immunisations?

- Please phone your GP or local council to have your child immunised
- Immunisations are free
- Immunisations should be given within 30 days of your child's birthday

Immunisation reminders are a service to the community from your general practitioners and the Riverland Division of General Practice Inc.
